## Puppy and Kitten Program

These programs contain everything your newest addition needs to get off to happy and healthy start.

- Three Comprehensive healthy puppy/kitten exams
- UNLIMITED diagnostic exams\*\***
- One fecal exam to screen for intestinal worms that can be passed from pets to humans
- Two roundworm and hookworm dewormings if needed
- Puppy vaccination series** for the following canine vaccines: Rabies, Distemper, Parvovirus, Adenovirus, Parainfluenza, Bordetella (kennel cough), Lyme, Leptospirosis (recommended for at risk puppies only)
- One Lyme disease, Ehrlichia, and Anaplasmosis screening test for puppies
- One Heartworm test for puppies
- Kitten vaccination series** for the following feline vaccines: Rabies, Feline Herpes Virus, Feline Calicivirus, Feline Panleukopenia Virus, Feline Leukemia Virus (recommended for all kittens)
- Feline Leukemia, Feline Infectious Virus, and Heartworm screening test for kittens

---

## Puppy and Kitten Programs W/ Spay or Neuter

These programs include everything in the standard puppy program, in addition to an ovariectomy (Spay) or orchiectomy (neuter).

If these procedures were performed at a human hospital – this is how they would be done, and the equipment used would be nearly identical. The only difference is we perform them for about \$15,000-\$20,000 less.

---

### Costs

**Puppy: \$22.99/month**

**Puppy with neuter: \$32.49/month**

**Puppy with spay: \$36.49/month**

**Kitten: \$ 19.49/month**

**Kitten with neuter: \$24.49/month**

**Kitten with spay: \$29.49/month**

**Kitten with Spay/Neuter and Declaw: \$37.49**

## Items Included in Surgery

- Pain medications before, during, and after surgery, including nerve blocks when needed, as well as all of your pets take home pain medications
- An intravenous catheter and intravenous fluids to maintain blood pressure during surgery, and for easy venous access during surgery\*\*
- Endotracheal tube placement to secure the airway
- Isoflurane gas anesthesia to maintain a safe and comfortable level of anesthetic depth during surgery.
- Dedicated anesthetic monitoring
- A heated surgery table complete with a bair hugger heating blanket (heating blanket only used if patients are high risk for surgical hypothermia)
- Pulse Oximeter
- Electrocardiogram (ECG/EKG)
- Esophageal Stethoscope/thermometer
- Capnograph (end tidal carbon dioxide monitor)
- Non Invasive Blood Pressure Monitor (NiBP)
- All surgeries are performed in a dedicated surgery suite
- One night of hospitalization to ensure a peaceful recovery
- Written discharge instructions to ensure proper home care
- Free suture removal (if skin sutures are placed)
- Complimentary nail trim

---

\*\*Due to the short duration of the procedure feline neuters do not include catheter placement unless deemed necessary

**\*Pre anesthetic bloodwork to screen for conditions that may complicate surgery may be added to any program for an additional \$5.00/month**

**\*A microchip placement and registration may be added to any program for an additional \$2.50/month**

**\*Prices listed are for routine, uncomplicated surgeries**

---
